Analog Aficionados 2019, Ron Quan

Author Ron Quan took over 100 pictures at the 2019 Analog Aficionados party.

Linear Systems president and host of the Analog Aficionados party Tim McCune, with Maxim Integrated CEO Tunç Doluca.

Noted tech author Ron Quan took these pictures at the 2019 Analog Aficionados party, held at David's Restaurant in Santa Clara California on February 16.

Ron holds hundreds of patents and worked for many companies in Silicon Valley and the San Francisco bay area. This year he tried to take portraits of the attendees using natural light.

The higher resolution files can be found here, in the sub-directory "\Files\" in the same order as this gallery.

Be sure to credit Ron Quan if you use any of these pictures for public or commercial use. If you are an attendee, you may well have a nice portrait to go with the free food and good analog companionship.

Check the website for the next party, and register for a badge so we can caption the pictures with your correct name.
